Aluminium Scaffolds can provide a cost effective platform for almost any application. Our in-house team of qualified scaffolders can design, deliver, erect and dismantle your solution onsite. Whether you are a home repairer, large building company, engineering department or events manager we have the experience and expertise to help.

At your service

Our professional in-house team of qualified scaffolders and access experts are dedicated to enhancing your productivity, reducing your overall project costs and improving the safety of your work environment. With more than 30 years experience in the industry our team can provide solutions for all your elevated access needs – big or small.

Enhance Productivity

There is no need to work in uncomfortable or awkward positions. In a more natural position, workers are significantly more productive. Large platform decks provide the ideal location for keeping tools or other equipment close at hand. In addition, platform maneuverability can allow you to access multiple work areas in seconds.

Reduce Overall Project Costs

Increased productivity equals decreased overall cost. The right access solution can save you thousands of man-hours and dollars. Whether you're looking for a long-term hire, short-term hire or to purchase, we can show you the cost savings you should expect.

Improve Safety

All of our equipment is tested, complies with AS standards and is maintained to the highest quality. With more than 30 years experience, our team of qualified access professionals can guarantee the safety of our aerial platforms.

We Are Here to Help

Aluminium Mobile Towers

Our aluminium scaffolding system provides a strong, highly flexible fixed or moveable platform that meets all applicable occupational health and safety standards. The system is easy to erect and requires no tools to assemble or dismantle. Choose from our large range of off-the-shelf towers or have our experienced qualified professionals design a solution specific to your needs.

- Light and strong Aluminium tube with weldless joints for extra strength.
- Safe work platforms include kick boards and compulsory fall protection.
- Unique easy-to-use double action locking hooks for additional safety and strength.
- Safe access platforms with access via secured internal ladder.
- Safe-lock legs with adjustment up to 400mm, to ensure safe easy leveling.
- Lockable 200mm dia. easy-roll castors.
- Qualified team of scaffolders and access experts ensure your solutions are delivered in the fastest and safest way possible.

Aluminium Kwikstage

We are the first suppliers of Aluminium Kwikstage products in Australia. Based on a similar design to its steel counterpart, Aluminium Kwikstage was created specifically for medium duty applications. Aluminium Kwikstage's unique 4 position multi-directional connection and highly variable component lengths make it the ideal choice for constructing safe elevated platforms in cluttered work areas. Aluminium Kwikstage integrates seamlessly with our existing Aluminium Scaffolding System.

Specialist Jobs

Our professional in-house team of qualified scaffolders and access experts will be able to design and build scaffolding to give you access to meet all your needs no matter how difficult your situation, saving you time and money

Project Costs

Improve Safety

Stair Access

Aluminium Scaffolds can supply and install Stair Access Towers to meet all OH&S requirements, fully compatible with our Aluminium Kwikstage. They offer a safe and practical means of access to the roof and all work areas.

We also have Double Stair Access, or "Stretcher" access where two stair units are placed side by side, to provide more room where greater traffic is expected, or gives access/egress options for injured workers in the event of an accident, these we build as steel scaffolding towers.

Steel Scaffold

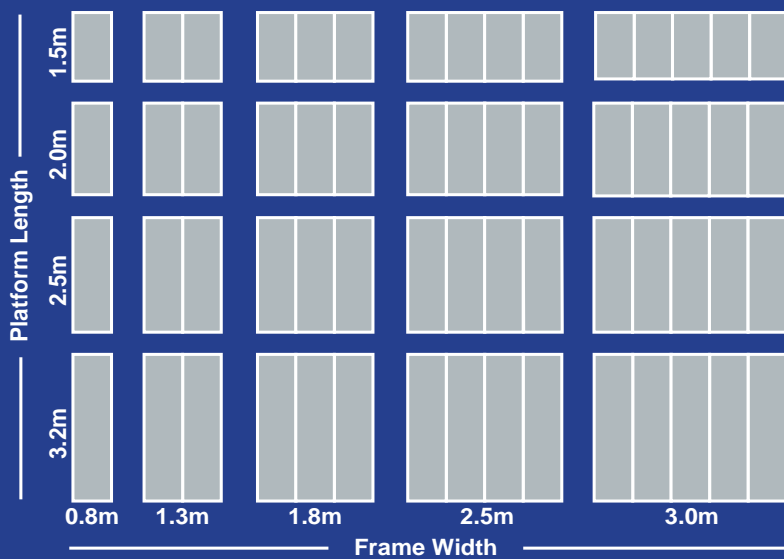

We can supply and install where required a full range of modular steel scaffolding, rated heavy duty 675kg. We can design a scaffold to give you the most effective solution for your situation, saving you time and money.
